

Deleted Panels

Revised 2/15/13

The following laboratory test panels have been eliminated or changed as noted below to comply with Medicare/Medicaid regulations. If any of these tests are requested, the order must be clarified with the physician. Use this information to communicate which tests were previously included in the panel to the ordering physician. A physician must order the needed components of the deleted panels individually. This is NOT to be used to order all parts of a discontinued panel without a physician's clarifying order. Please call X22800 with questions.
